### Mandatory Session 33A Seminar

It is the new season and a new license renewal cycle, so don't get left behind. These first sessions will be important to get completed because before the year is out you will have to have completed 12 hours of mandatory education to maintain your status as an inspector. NMPGIA.

### New Format for 1 Hour CE Seminars

Good News on a format change to the Continuing Education Seminars. The State has changed things so now rather than just a set curriculum there will an independent speaker whom is a product specialist to present information and answer questions directly. We believe this is a great change and will help bring more relevant and timely information to our organization on new products and code changes, similar to several years.
